About the Company

Vision
Market leader in the motorcycle industry, emerging as a global competitive centre of production and exports.

Mission
A dynamic growth oriented company through market leadership, excellence in quality and service and maximizing export, ensuring attractive returns to equity holders, rewarding associates according to their ability and performance, fostering a network of engineers and researchers ensuring unique contribution to the development of the industry, customer satisfaction and protection of the environment by producing emission friendly green products as a good corporate citizen fulfilling its social responsibilities in all respects.

Ownership and Legal form
Atlas Honda Limited is a public limited company listed on the Pakistan Stock Exchange. It is a joint venture between Shirazi Investments (Private) Limited (SIL) and Honda Motor Company Limited, with SIL holding 52.43% of issued, subscribed and paid-up capital as at March 31, 2018.

Headquarters and Operations
We operate in Pakistan and are engaged in progressive manufacturing and marketing of motorcycles and spare parts. Our registered office is located at Lahore whereas our manufacturing & assembly facilities are located at Karachi and Sheikhpura with branches, customer care centers, warranty & training center and other offices located at Karachi, Hyderabad, Multan, Lahore, Faisalabad, Rahim Yar Khan and Islamabad.

Scale of the company
During the year ended March 31, 2018, our net sales amounted to Rs. 77.5 billion, with sales of more than one million motorcycles. Net profit for the year amounted to Rs. 4.7 billion while total capitalization was Rs. 31.8 million with equity of Rs. 16.0 billion. Our workforce comprised of 1,611 permanent employees as at March 31, 2018.

Supply chain
Our supply chain spans from procurement of machinery, raw materials, semi-finished & finished parts, services and other inputs from local and foreign vendors to delivery of finished motorcycles and parts to customers through a nationwide network of dealers. Our supply chain is both labour and capital intensive. During the year, we paid Rs. 64.1 million to our supply chain partners on account of purchases of goods and services.

Activities, Brands, Products & Services and Markets Served
Atlas Honda serves the needs of automotive sector in Pakistan. Our customers mainly include dealers and institutions. We manufacture and sell various types of motorcycles in the categories of 70cc, 100cc, 125cc and 150cc mainly through a nation-wide network of dealers. We also market motorcycle spare parts and offer after-sale services through the network. Atlas Honda does not sell any product that is banned in any market.

Memberships and external initiatives
Atlas Honda is a member of the following major associations:
1. Pakistan Automotive Manufacturers Association (PAMA)
2. Pakistan Business Council
3. Federation of Pakistan’s Chambers of Commerce and Industry
4. Chambers of Commerce and Industry of:
   • Karachi
   • Lahore
   • Sheikhpura
   • Overseas Investors
5. Management Association of Pakistan
6. Marketing Association of Pakistan

We do not provide any funding to these associations. However, we take part in events such as exhibitions, seminars and workshops organized by these associations through sponsorships or otherwise.

Further, in addition to our internally developed charters, code of conduct & guidelines, we commit to various externally developed initiative, charters & principles, including:
• ISO 9001: 2008 (Quality Management System).
• GRI Sustainability Reporting Standards.

Significant changes
There were no major changes in our supply chain, locations, operations and organizational structure during the year. However, we continued to make significant investments for capacity expansion as per plan. Further, we launched two models, namely CB 150F and CB 250F during the year.

The Board expects employees to bring to their attention, any breach or suspected breach of these principles.

Provision has been made for employees to be able to report in confidence and no employee will suffer as a consequence of doing so.

CEO Message on Sustainability
“Being a frontrunner, we recognize the need to lead by example and are committed to making sustainability a way of life within the organization. This approach is crucial for securing a sustainable future of our business and creating shared value for our stakeholders.”

I am pleased to present our 6th Sustainability Report. This report is structured around the key themes which most interest our stakeholders and also allow our commitment to sustainability and core values to shine through.

We don’t only focus on what we achieve, but how we achieve it. Therefore, sustainability is an integral part of our way of doing business and it drives us to constantly seek out new solutions to reduce environmental impacts of our activities, to grow together with communities of which we are part and to build long-lasting relationships with our associates, suppliers and customers. Atlas Group’s fundamental business doctrine – the Atlas Way which comprises of the Atlas Culture and Atlas Systems- act as guiding principles for all our endeavours.

In our history of fifty five years, we have made significant progress – our strong market performance is delivering value for our shareholders, while we have also embedded more effective sustainability practices into our day to day business. These include focus on reducing carbon emissions, improving energy consumption, enhancing waste management techniques, creating safety awareness, improving fuel efficiency of our products and strengthening our approach to human rights. Further, we continue to make investments which are aimed at meeting the demand for reliable and affordable mobility solutions in Pakistan. These investments are also a contribution towards socio-economic development especially for creation of employment opportunities. Our localization efforts also demonstrate our commitment to the Country. We strive to ensure that our associates remain highly engaged as it is a key driver to high performance and organizational success.

We truly believe that sustainable business is the only way forward in today’s world of finite resources and increasing demand. We recognize that success of our business is only possible if we can engage in a regular and reliable dialogue with our stakeholders. We are constantly learning and are committed to making inroads in new areas while building on our key strengths.

I would like to specifically mention the contributions of our partner, Honda Motor Company, whose proactive participation and constant guidance have always been a source of learning and inspiration. With persistent encouragement of our stakeholders, we hope to continue working and investing in a sustainable future for our business and society.

Saquib H. Shirazi
Chief Executive Officer

Karachi: April 30, 2018
Sustainability Strategy

Atlas Honda manages its business in accordance with the responsible corporate governance principles geared to sustainable value creation in all areas. To ensure compliance with these principles, clear lines of accountability have been drawn in our management systems and are further reinforced through guidelines as well as control systems.
Governance Structure
Atlas Honda's strong governance framework provides a solid structure for effective and responsible decision-making within the organization. The highest decision-making is carried out at the shareholders' meetings, supported by the Board of Directors. The Board has oversight of the risks and opportunities arising from the company’s activities and is responsible for setting the direction, strategies & objectives and for monitoring the implementation of the same by management.

Board of Directors
We have an experienced and dynamic Board with the right blend of skills to deliver and further develop strategies. Presently, the Board comprises eight Directors, including four non-executive Directors, three executive Directors and one independent Director. Non-executive Directors are elected to enhance objectivity. We do not have a claimed quota for Board of Directors based on gender, ethnicity or age group. The Chairman is responsible for the overall discharge of the Board's duties. The office of the Chairman and the Chief Executive Officer (CEO) are separate and the Chairman is a non-executive Director.

The Chairman of the Board of Directors is selected from within the Board. The Board may from time to time establish committees, to assist it by focusing on specific responsibilities in greater detail than is possible for the Board as a whole, reporting to the Board and making any necessary recommendations. The statute requires the Board to formulate Audit Committee and Human Resource & Remuneration Committee.

All the matters including election, appointment and disclosure of interest are governed by the statutory requirements and regulations laid down by SECP and PIA. No non-compliance were identified during the year. Further details about the directors and matters carried out during the year can be found in the Directors profile section and Statement of Compliance with the Code of Corporate Governance in the Annual Report 2018.

Committees of the Board
Each Committee of the Board has a written ‘Terms of Reference’ outlining their duties and responsibilities. The Committees report on their activities and results to the Board. The table below summarizes the terms of reference, number of members and frequency of meetings of the Committees.

<table>

Board's Role in Shaping Sustainability Policy
The Board provides leadership to the Company in a manner that promotes its long-term success, thereby maximizing value for the stakeholders. It also sets the direction for the Company’s values, ethics & business policies and practices. All the strategic plans, budgets, capital expenditures, investment proposals and matters of strategic importance are approved by the Board. However, some of the decisions are taken in the General Meetings of the Company as per the requirements of Companies Act, 2017. The Board also provides direction on sustainability policy, and sustainability initiatives to enhance the positive impacts and reduce the negative impacts on the economy, environment and society. The execution of the Board’s directives and policies is carried out by the respective management teams whose performance is reviewed by the Board. The Board also oversees operating & financial performance, risk management & internal controls and compliance with legal requirements.

The Chairman, in collaboration with the Company Secretary and senior management, is responsible to ensure that the Board members are provided, at all times, with the information necessary for them to effectively discharge their duties and responsibilities. On appointment, Directors take part in an “Induction Program” to broaden their knowledge and understanding of the business. The Directors are also encouraged to attend courses which provide information and training relating to their duties, responsibilities, powers and potential liabilities. The Company Secretary arranges an appropriate Director’s Training Program in line with the mandatory requirements of the Code of Corporate Governance.

Management Remuneration
The remuneration of the Board members is approved by the Board itself. However, in accordance with the Code of Corporate Governance, it is ensured that no director takes part in deciding his own remuneration. We do not pay remuneration to non-executive directors except fee for attending meetings of the Board, in order to...
to retain the best talent, our remuneration policies are structured in line with prevailing industry trends and business practices. For information on remuneration of the Directors and CEO in 2017-18, please refer note 35 of Financial Statements.

**Board’s Performance Evaluation**

The evaluation of Board’s role of oversight and its effectiveness is a continuous process, which is appraised by the Board through Human Resource & Remuneration Committee. The core areas of focus are:

- Alignment of corporate goals and objectives with the vision and mission of the Company;
- Strategy formulation for sustainable operation;
- Board’s independence; and
- Evaluation of the Board’s Committees’ performance in relation to discharging their responsibilities set out in respective terms of reference.

The performance of the CEO is formally appraised through the evaluation system which is based on quantitative and qualitative values. It includes the performance of the business, the accomplishment of objectives with reference to profits, organization building, succession planning and corporate success.

**Roles & Responsibilities of Chairman & CEO**

The Chairman’s primary role is to guide long-term strategic planning for Atlas Honda including:

- Presiding over the Board and ensuring that all relevant information has been made available to the Board;
- Defining the Company’s philosophy and objectives;
- Safeguarding shareholders’ interest in the Company;
- Responsible for building the Company’s image nationally and globally;
- Ensuring the appropriate recording and circulation of the minutes of the meeting to the Directors and officers entitled to attend the Board meetings;
- Major spokesman of the Company, responsible for liaison with the senior most levels of the Federal and Provincial Governments;
- Overseeing the Company’s macro approaches and public relations in the broad sense, including its relations with public organizations and other companies; and
- Commitments and de-commitment of strategic investments.

The CEO is responsible for reporting the Company’s performance to the Board of Directors. He is also responsible for all matters pertaining to operations of the Company under direction of the Board of Directors. His responsibilities include:

- To plan, formulate and implement strategic policies;
- To build and maintain amicable relations with government departments, trade associations and regulatory bodies;
- To ensure the achievement of productivity and profitability targets and that the Company operates efficiently;
- To ensure that the chain of command in the Company is clear to facilitate the maintenance of discipline, the roles and duties of all managers clearly define their functions to ensure accountability;
- To ensure that necessary coordination exists between various departments of the Company to achieve smooth and effective operations;
- To maintain a regular review of duties and functions of the staff to ensure that there are no duplications of efforts in office methods and procedures and that all operations are carried out efficiently and economically;
- To ensure that technical information made available to the Company under technical service or royalty agreements is used solely in the manufacturing of approved products and the staff of the Company maintains strict confidentiality of such information;
- To ensure that the Company’s interests and assets are properly protected and maintained and all the required Government obligations are complied in a timely manner;
- To maintain close liaison with the Government, customers, suppliers and sales offices;
- To chalk out human resource policies for achieving high professional standards, overall progress / betterment of the Company as a whole;
- To pay all Government dues on or before due date and obtain all refunds due from the Government.
- To ensure that proper succession planning for all levels of hierarchy exist in the Company and is constantly updated;
- To ensure proper functioning of the Management Committees of the Company of which he is the Chairman;
- To prepare and present personally to the Board of Directors the following reports/details:
  - Annual business plan, cash flow projections and long term plans.
  - Budgets including capital, manpower and overhead budgets along with variance analysis.
  - Quarterly operating results of the Company in terms of its operating divisions & segments.
  - Promulgations or amendment of the law, rules or regulations, accounting standards and such other matters as may affect the Company.
  - Reviewing performance against budgets / targets, revenue and capital expenditure, profits, other administration, commercial, personnel and other matters of importance to the Company.
- To ensure welfare and training of the staff in an atmosphere is created among employees giving them a sense of participation and providing them with an opportunity to give their best;
- To ensure that every employee is treated equally as an individual regardless of his designation; career development is on merit basis and each employee is helped to develop pride of performance through continuous study and training so as to form a team in which all levels of employees work together with common goals to strengthen the position of the Company;
- To ensure that the Company operates with minimum staffing and paperwork.

**Committees Reporting to the CEO**

The CEO is supported by Committees that facilitate him in the performance of his duties. These Committees meet frequently and ensure implementation of sustainability framework in various aspects of Atlas Honda’s operations. The implementation of the framework is ensured by various departmental heads who report the activities and progress to these Committees. Input is also acquired from associated third parties through our process of stakeholders’ engagement. The implementation of sustainability framework is frequently monitored by Internal Audit function along with the annual assurance from an independent expert before reporting the results to the stakeholders.
A Risk Management Committee is responsible for reviewing and forwarding long term plans, capital and expense budget, development and stewardship of business plans. Maintaining healthy environment and providing advice to CEO in the normal course of business.

### Risk Management

We have entity-wide risk management processes for identifying, evaluating and managing the principal risks. The Board is responsible for the systems of internal control and risk management and for reviewing each year the effectiveness of those systems. The key features of our enterprise risk management and internal control process include:

- The Audit Committee, on behalf of the Board, considers the effectiveness of the internal control procedures during the financial year. It reviews reports from the internal and external auditors and reports its conclusions to the Board.
- A Risk Management Committee is responsible for reviewing the key risks and the strategies to mitigate/counter these risks.
- Our Internal Audit function carries out the continuing assessments of the quality of risk management and control, and promotes effective risk management in the lines of business processes.

During the year, the Committee discharged its responsibilities and reported the matters in Report of the Audit committee included in the Annual Report.

### Compliance and Integrity Management

Our Code of Conduct (the Code) provides guidelines on ethical standards. It covers issues such as bribery and corruption, fraud, insider trading, legal compliance, conflicts of interests, human rights and discrimination. The Code includes a commitment to conduct our business with due regard to the interests of all our stakeholders and the environment. The Code requires compliance with all applicable laws and regulations as a minimum standard. In essence, the guidelines to the Code outline our approach to ethics management, which includes all elements recognized as best practices in ethics management. The Code guides interactions with all the stakeholders, including employees, vendors and customers.

The code is reviewed annually and any changes therein are approved by the Board. The same is communicated to all the employees, vendors, service providers and customers and is available on our website.

#### Whistleblower Policy

Our purpose and values set the standards for how we do business and actively encourage openness, integrity and accountability. Our Whistleblower Policy has been developed to ensure that concerns are raised regarding actual or suspected contraventions of our ethical and legal standards freely and without fear of repercussions. The policy provides a number of avenues regarding actual or suspected contraventions of our ethical and legal standards freely and without fear of repercussions. The policy provides a number of avenues for disclosure including internally through managers and Business Ethics Committee. Matters reported are investigated by the Internal Audit function and it is determined whether there is evidence to support the matter raised or to refuse it. Information regarding any incident is reported to the Audit Committee. The reports include details of the matter, measures taken and the status of any investigation. During the year, no such incidences were reported.

#### Privacy and Data Protection

The Code of Conduct contains explicit requirement about Business Integrity and Anti-corruption, which every employee is obliged to adhere. We have a dedicated Internal Audit department which conducts investigations and provides support to the Audit Committee in the evaluation of risk management. The department regularly reports the findings to the Audit Committee for taking appropriate action. No incidence of corruption was reported during the year.

#### Conflict of Interest Policy

Our Code of Conduct contains explicit requirement about Business Integrity and Anti-corruption, which every employee is obliged to adhere. We have a dedicated Internal Audit department which conducts investigations and provides support to the Audit Committee in the evaluation of risk management. The department regularly reports the findings to the Audit Committee for taking appropriate action. No incidence of corruption was reported during the year.
Grievance/Feedback System
We believe in protecting interest of our investors and shareholders. The shareholders give their feedback in General Meetings and we encourage them to do so to have a good understanding of their views on our operations and decisions. Accordingly, a “Grievance/Feedback System” has been established that provides an avenue for reporting and resolution of all complaints/queries on timely basis.

A designated e-mail address has been created which is investor.relations@atlashonda.com.pk to facilitate investors for submission of queries/grievances and feedbacks. In addition, complaints and suggestions can also be received in writing, duly addressed to Company Secretary. All grievances/queries are resolved and communicated to the investors on timely basis after due verification procedures.

Sustainability Strategy Framework
Our sustainability strategy focuses on crafting long-term value and providing a level playing field for future generations to meet their needs. This goal can only be attained through the efficient use of available resources, commitment to creating sustainable products and solutions and treating the environment and people equitably and with respect. The commitment of doing business in a sustainable way sets us apart from our competitors, leading to customer satisfaction, appreciation, brand recognition and increasing product demand. Our Sustainability Strategy Framework supports our business strategy and is aligned with the company’s purpose. The framework has five key areas of focus:

a) Environmental Protection
b) Product Responsibility
c) Corporate Social Responsibility
d) Employee Management
e) Vendor Management

We are guided by our sustainability framework while making efforts for creating sustainable value for all our stakeholders. This framework is a product of Atlas Group’s fundamental business doctrine - the “ATLAS WAY”. It comprises of the principles of the “ATLAS CULTURE” and the “ATLAS SYSTEMS”. The principles of the Atlas Way cover all departments, operations, activities and aspects of business and provide ideal guidelines for their progressive development. The ultimate goal is to obtain excellence in operations and quality in products without compromising on protection of environment and interest of society at large.

We ensure adherence to the best practices for reporting sustainability issues through application of our framework and GRI Standards. Our sustainability framework defines the way we do business which is supported by policies, guidelines, values and management tools.

The following diagram summarizes our framework and approach to sustainability:

Atlas Way

- Management by Objectives (MBO) to align activities towards agreed company goals.
- Implementing 7S vision (Strategy, Structure, System, Style, Staff, Skills and Shared values) for the Company.
- Inducting and retaining competent and skilled staff - right man for the right job.
- Using BCG model for strategic direction.
- Creating value through implementation of internal controls (SOPs and policy manuals).
- Management development to produce performers, organization builders and strategists.
- Active participation in management meetings for continuous performance improvement.
- Ensuring accuracy and control of information / data through efficient MIS.
- Judicious sharing of profitability between employee bonuses, dividend payout and profit retention.

Atlas Systems

- Corporate governance.
- Respect, Recognition and Reward.
- Value of time.
- Recruitment and career advancement based on integrity, merit, experience and skills.
- Education and training of staff and descendants.
- Self reliance.
- Leading by example.
- Humility and Excellence.
- Living within one’s means, saving for the future and donating for good cause.
- To be happy and healthy.

(We Look Beyond Horizons)
Stakeholder Engagement

Being the largest manufacturer of motorcycles in the country, both our manufacturing activities and our products have significant effect on the environment as well as on diverse groups of stakeholders. Simultaneously, the views, decisions and actions of these groups have an impact on the success of our business. We, therefore, engage in an ongoing dialogue regarding sustainability topics with our stakeholders in relevant markets and at all locations. This allows us to understand the issues, formulate strategies and deliver according to their expectations.

The engagement process starts with the identification of stakeholders. We define stakeholders as those who are potentially affected by our operations or who have an interest in or influence on the Company’s business. Stakeholders are identified and then prioritized on the basis of nature of relationship, influence, responsibility, dependency, proximity, willingness and ability to engage. Consultation is then carried out with the identified stakeholders to gain input on topics which are of interest to the stakeholders or which can significantly affect us. The Company’s range of stakeholders includes shareholders/investors, employees, customers, dealers, vendors, local community, Government & regulators, industry associations & representative bodies and analysts. Process and frequency of consultations with stakeholders, topics identified and our responses to the same are as follows:

<table>

- Safe product use  
- Correct product information  
- Transparent communication |  
- Production of high quality products  
- Efficient supply chain  
- Capacity expansion to meet demand  
- Focus on after-sale service |
Materiality Analysis

Taking into account the key topics identified by our stakeholders, we clearly understand our current status and necessary improvements we should make. We used GRI Standard GRI 101 Foundation 2016 reporting principles of sustainability context, materiality, completeness and stakeholder inclusiveness, for defining our report contents. These principles have been consistently applied at varying degrees during identification, prioritization and validation steps, while defining material topics for this report. Based on the results of the stakeholder engagement, review of industry specific issues, and internal analysis, a materiality analysis was carried out to produce a materiality matrix containing the material sustainability issues for our operations.

The materiality matrix below provides the necessary framework for organizing these issues. By creating and employing this matrix, we confirm the coverage of each issue and clarify where it is positioned.

The matrix divides up the topics to show those which have high impacts and those which have moderate impacts of Atlas Honda’s activities and which are highly relevant and those which are moderately relevant to its stakeholders. The prioritization of topics is based on materiality analysis for non-financial risks as per GRI standards. The severity, likelihood and relevance to business objectives and stakeholder’s interests were the guiding principles during this analysis. The Social Responsibility Committee analyzes the risks associated with each material topic and recommends actions for prevention or mitigation of negative impacts and maximization of positive impacts. The content and scope of this report is also derived from this matrix.

The boundaries for material topics have been identified on the basis of their impacts whether lying within the organization or outside the organization. The reporting principles for defining report content from GRI Standard GRI 101 Foundation 2016 have been used while identifying the boundaries for material topics.
Environmental Protection

Environmental protection and the efficient use of resources are fundamental drivers for Atlas Honda’s actions. With respect to our business activities, we aim to use all the natural resources as efficiently as possible while reducing emissions into the environment to a bare minimum.
**Our Management Approach**

Environmental protection is fundamental to our sustainability strategy. In light of challenges such as climate change, pollution and scarcity of resources, Atlas Honda aims to be the most resource-efficient mobility solution provider in Pakistan. Our focus lies on increasing the energy and resource efficiency of our production processes and on reducing emissions and waste. These measures allow us to minimize our impact on the environment, make a contribution towards achievement of Honda’s Environmental Vision and reduce our costs. Environment related issues arising from energy & resource consumption, emissions, effluents & waste and water are managed by our Health, Safety & Environment department along with the management team, which defines and implements the necessary procedures to achieve targets. We have a continuously evolving Environmental Management System (EMS) in place which is supported by our Environment Management System (EMS) is intended to formalize procedures for managing and reducing environmental footprint. It helps to identify and analyze, in a timely manner, the environmental impacts that result from our business operations. It also helps us in developing solutions to address those impacts. Our EMS is based on relevant legislation such as the Pakistan Environmental Protection Law, International Standards and Honda’s guidelines, as well as best practices. The management system is certified in accordance with ISO 14001:2015, an International Certification for EMS.

We conduct internal and external audits of our EMS and strive to improve it further. During the year, we identified tasks as a result of the In-house audits and made improvements accordingly. Periodically by representatives from Environmental Protection Agency (EPA) are also facilitated to ensure compliance with regulatory requirements. No non-conformities have been reported during the year. Further, no environment-related complaints were received through our formal grievance mechanism for the year 2017, in the category of Environment & Health Management. We apply a product life cycle approach for management of environmental impacts, which considers the entire life cycle - from product development to purchasing, manufacturing, sales & service, use, recycling and administration. This approach makes it easier to identify opportunities, minimize or enhance impacts and understand boundaries in every aspect of our business. It also helps us to understand how our policies and impacts are interrelated. We also apply the precautionary principle, whereby we act responsibly despite not having the full scientific knowledge of negative impacts, to ensure we stay ahead of potential risks.

**Environmental Policy**

The policy outlined below forms the basis for our environmental work across the business:

<table>
<thead>
<tr>
<th>Life Cycle Stages</th>
<th>Major initiatives in each domain based on impacts identified</th>
</tr>
</thead>
<tbody>
<tr>

Energy Consumption & Emission

We monitor energy consumption and emission on regular basis to identify and incorporate best practices and to improve our energy management. Accurate data on energy consumption and emission is obtained from our management systems. This enables us to address irregularities and implement any necessary measures to ensure our performance is on track. Collecting comprehensive data helps us in understanding not only the energy savings, but also the economic benefits that can be achieved through specific measures.

The energy consumption during the year was 464,811 GJ. Compared to 2017, the total energy consumption during the year under review increased by 13.9%. This was due to higher production level. However, the energy consumption per motorcycle decreased by 1.8% from 443 to 435 KJ/Motorcycle.

The emissions during the year were 23,879 tons of CO₂, which was 1,765 tons less than previous year. Further, CO₂ emissions per bike reduced from 28 to 23 kg/motorcycle. In addition to being in compliance with Pakistan Standards for Quality Control (PSQC) in respect of CO₂ emissions, noise levels and smoke, all our products comply with EURO II standards of carbon emission.

LED Lights
At our assembly plant, previously fluorescent tube lights and mercury bulbs were used for lighting. In 2017, 60% of such lights and bulbs were replaced by energy efficient LED tube rods and high-bay lights. This year, the ratio has improved to 70%. Whereas, at engine machining plant, 100% lighting is being done through LED tube rods and high-bay lights. Further, arrangements have been made to use day light when possible. This has helped us to save 2,598 GJ a year, whilst 331 tons of CO₂ emissions are reduced.

Solar Panels
We are determined to extend our use of renewable sources for energy. Installation of solar power systems is being undertaken as an effort to derive clean and affordable energy. This is helping us combat greenhouse gas emissions and reduce our dependence on fossil fuel or grid-based electricity. We completed our second project of installation of solar panels of 360 KW this year. This initiative will reduce the CO₂ emissions by 512 tons every year.

Energy Air Compressor
Previously, separate air headers were installed for 6 bars and 7 bars air pressure, which had improved the energy efficiency. Under this, 6 bars air pressure was supplied to four areas at Sheikhupura (SKP) plant. This year, 6 bars air pressure is supplied to 7 areas at SKP plant which has improved the energy efficiency by 354 GJ per year and reduced CO₂ emissions by 48.6 tons per year.

Synthetic Natural Gas (SNG)
We have enhanced the LPG efficiency by adding air at specific ratio to LPG which results in SNG. It results in reduction of LPG consumption by 21%.

Energy Conservation & Emission Reduction Initiatives
In order to reduce our energy consumption and emissions, primarily CO₂, we continue to invest and implement energy efficiency measures in our offices and production processes. During the year, energy conservation of 7,808 GJ and emission reduction of 1,765 tons was achieved through following initiatives:

- Solar Panels
- LED Lights
- Energy Air Compressor
- Synthetic Natural Gas (SNG)
Material, Effluents & Waste

The environmentally friendly use of raw materials is taken into account even at the development phase through life cycle engineering. We shape our supply chain and material cycles accordingly, allowing us to gradually increase the use of secondary raw materials in our production processes. Natural resources are being used in the most efficient manner with the objective to minimize depletion of the planet resources. We are working to replace artificial materials with renewable materials whenever it makes technical, business and environmental sense and is socially viable. We closely monitor the consumption of raw materials having substantially improved on the environment and treat them according to our environmental policy.

Waste resulting from our production processes mainly include waste water metal, plastics, rubber, paper, packing and used oil. Waste water is treated through Waste Water Treatment Plant before it reuses in sewage drain. The resulting waste and effluents are discharged through incineration, recycling, landfill and disposal to legitimate contractors at certified waste disposal facilities. During the year, 10,907 tons of waste was released with the reduced intensity of 15% per motorcycle. There were no significant spills during the year.

Minimizing packaging waste

In our production processes, we use recycled packaging for parts to reduce waste and minimize our impact on the environment. The use of reusable packaging whenever possible has reduced our packaging waste by 3.5 tons per year.

Aluminum Waste

In aluminum casting process, aluminum is obtained in raw shape Initially, during the finishing process, used aluminum is reused with new material at specific ratio leading to weightage reduction and efficient usage of non-renewable material. By this arrangement solid waste has been reduced by 65.3 tons in a year.

Incorporation

Incorporation is performed to treat solid hazardous waste with controlled combustion, reduce the release of greenhouse gases and reduce air pollution. In the process of incorporation solid waste is collected, crushed and moved into heating chamber. Ash generated by burning process is disposed, while gases produced are filtered and exhausted through the chimney. We have successfully incorporated 130 tons of hazardous waste this year in coordination with EPA certified third party.

Water

We seek to reduce our water footprint by practicing water-saving practices among employees and adopting water-efficient technologies and equipment whenever possible. The majority of our water use can be attributed to our production process, cooling, and water consumption by our employees. Our main source of water is the water that is available to us at our factories. During this period, 28,000 cubic meters of water was used, with the reduced intensity of 15% per motorcycle. There were no significant spills during the year.

Minimizing packaging waste

In our production processes, we use recycled packaging for parts to reduce waste and minimize our impact on the environment. The use of reusable packaging whenever possible has reduced our packaging waste by 3.5 tons per year.

Aluminum Waste

In aluminum casting process, aluminum is obtained in raw shape Initially, during the finishing process, used aluminum is reused with new material at specific ratio leading to weightage reduction and efficient usage of non-renewable material. By this arrangement solid waste has been reduced by 65.3 tons in a year.

Waste Water Treatment Plant

Water is used throughout our production processes which results in waste water. To prevent the waste water from being discharged as produced, waste water from all over the plant is collected and treated to remove the harmful pollutants at Waste Water Treatment Plant. We, as a responsible organization abide by the legal requirements of waste water treatment as well as meet “Punjab Environmental Quality Standards”. In a year, around 554,705 cubic meters of water is treated and safely drained into the sewerage.

Biodiversity

We believe that minimizing the environmental impact resulting from our products and business activities represents the greatest contribution, we can make to biodiversity conservation. We recognize that emissions and other pollutants are two of the greatest impacts of business activities that threaten biodiversity. Consequently, we are working systematically to minimize both impacts.

Further, we have been putting a good deal of effort into activities that have led to the conservation of biodiversity. Over the years, we have been undertaking various initiatives such as tree-plantation and water-recycling. During the year, a project of plantation of 18,000 trees has been initiated out of which 4,000 trees are already planted within the premises of Sheikhpura plant. Remaining trees are planned to be planted at Schools, Government Institutes and Reservoirs in collaboration with the Environmental Protection Agency. We will be responsible for plantation, protection and maintenance of the trees.

Both our manufacturing plants are located away from protected areas to minimize the effects of CO2 and other greenhouse gases on the protected areas.
Product Responsibility
Serving our customers’ responsibly is at the heart of our business and critical to our ability to create value for all our stakeholders. We place utmost priority in delivering quality products & services and ensuring customers’ safety to deliver truly compelling customer experiences.
Our Management Approach

As a market leader in motorcycle industry in Pakistan, we take a comprehensive approach to product responsibility. We are committed to offering sustainable mobility solutions by maintaining the quality of our products, ensuring customer safety, appropriately marketing our products and providing best after-sale service. We constantly monitor and update all our business aspects and processes relating to product quality, marketing and customers safety to ensure that they are in line with our commitment to sustainability. We are committed to continuously expanding our business and to providing our customers with a diversified selection of quality products. In addition, we keep expanding our sales and service network. Currently, we have a vast network of sales and service outlets in operation across Pakistan. In order to ensure customer satisfaction, we encourage customer feedback and train our dealers with respect to the safety of our customers and other road users, we follow Honda's vision and combine safety features in our products with safety training. During the year, the health and safety impacts of all products were assessed for improvement.

Product Quality

Atlas Honda aims to be a company trusted by its customers for its quality products. We focus on quality at every stage, from the planning of new products through development, manufacturing, distribution and sales to after-sales. We validate that our manufacturing processes deliver products that meet customer expectations. To foster a culture of cooperation and problem-solving, we continue to evaluate our products’ performance after its sale and use this information to develop and implement effective solutions.

Honda’s Quality Cycle

Our global partner, Honda Motor Company Limited follows a uniform quality strategy worldwide. In order to live up to the high quality standards, quality assurance activities are governed by a central body at cross band level.

By applying and reflecting design and development expertise at the preparation and production stages, we are able to deliver enhanced quality through the creation of drawings designed to facilitate manufacturing, as well as develop manufacturing control techniques that limit process variability. Post-sale, improvements are made to product quality based on an analysis of customer feedback. These improvements are reflected in our know-how for the next round of design and development.

Quality Improvement Programs

<table>
<thead>
<tr>
<th>Program</th>
<th>Objective</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vendor Improvement Program (VIP)</td>
<td>To establish Quality Management System (QMS) at vendor end and to control process rejections and improve quality management skills of suppliers.</td>
</tr>
<tr>
<td>Service Instructor Quality Program (SIQP)</td>
<td>To foster high quality, dedicated service staff and standardized training delivery across the Company as per Honda standards. Future trainers are trained to achieve proficiency in training, communication skills and key instructional abilities.</td>
</tr>
<tr>
<td>Training of service and Dealers Staff</td>
<td>A one day training program to improve their skills of judging problem pertaining to a claim to ensure timely and efficient rectification.</td>
</tr>
<tr>
<td>Quality Control (QC) Foreman course</td>
<td>A two day program to understand how to put into practice the quality control techniques and approaches needed in quality assurance activities in manufacturing.</td>

Marketing & After-Sale Service

Product & Service Labeling

For product information and display, we not only comply with strict local laws and regulations, but also place strong emphasis on safety, human rights, environmental issues and ethical standards. Product labeling is a key feature of our products’ display which helps in marketing the product and contains detailed instructions for users. In order to convey product information, an Owner’s Manual is provided to each customer with the purchase of each product. It contains all information relating to sourcing, contents, safe use, maintenance and disposal.

At the time of delivery, technical features are explained to the customer through demonstration. Moreover, during the year, no incidents of non-compliance with regulations and voluntary codes concerning the product and service labeling, resulted in any fines or warnings, as all products were in compliance with relevant labeling requirements.

Marketing Communication & Anti-Competitive Behaviour

We facilitate our customers by providing information and purchasing support services and staying connected through Website, Facebook, Twitter and Instagram. Our online presence enables us:

- To stay connected with customers round the clock;
- To help customers in locating the nearest dealers;
- To provide customers with detailed information pertaining to product features and cost.

We make sure that our advertisement content does not depict any anti-competitive behaviour or intentions and abstain from any kind of malicious, offensive or anti-social content in all our marketing communications at all levels.

Furthermore, no incidents of non-compliance with
regulations and voluntary codes concerning the provision and use of product and marketing communications, including advertising, promotion & sponsorship in other business operations have been reported during the year.

**Customers' Confidentiality**
We have implemented a B2B system to administer control and store data centrally for smooth functioning of business. Stringent privacy guidelines are in place to ensure security of critical data pertaining to customers. We have also developed a business continuity and disaster recovery plan to ensure business continuity.

Due to these precautionary measures, there has been no non-compliance pertaining to breach of customer privacy and loss of customer data during the year.

**Customers' Feedback**
We are aware of the fact that customers’ expectations and inputs are critical for bringing improvements in product quality and making it more user-friendly. Data on customer complaints and expectations is collected through external survey institutions, market surveys and visits to dealerships. We also maintain a track of turnaround time in which complaints are resolved. In order to ensure effective operations of customer care centers, we organize trainings for our staff. During the year 2017-18, 3,066 customers were served at free checkup camps and 293 oil change camps were held.

In another initiative, mega free checkup camps were arranged on March 23, 2018, to serve more than 84,000 customers through 874 free checkup camps at over 300 locations.

**Dealers Convention**
We provide all our dealerships with information on road and long-term strategies, products, and services in a timely manner. We strive to cultivate a relationship of trust and improve communication among dealers and between dealers and Atlas Honda through various sales, service and parts dealer conventions. During the year 2017-18, we organized 10 conventions having participation of 7,216 dealers.

For us, dealers are at fore-front and each dealership is vitaly important to our continued success in the market. Therefore, we only engage with dealers who have the ability to consistently represent our brand.

**Pakistan Auto & Parts Show 2018**
The Pakistan Association of Automotive Parts and Accessories Manufacturers (PAAPAM) organized Pakistan Auto Show 2018 at the Expo Centre, Lahore from 2nd to 4th March 2018. The event was aimed at showcasing achievements of Pakistan’s automotive industry. We presented our portfolio of motorcycles along with genuine parts at the event. Further, safety simulator was also set up for safe riding training of our customers.

**Customer Safety**
Our safety vision is aligned with Honda’s Global Safety Slogan: “Safety for Everyone”

Honda dreams of a collision-free mobile society where our customers, and everyone sharing the road, can safely and confidently enjoy the freedom of mobility.

**Safety Riding Training and Education**
As a part of safety education initiatives, this year we trained 304 Safety Advisors at dealerships across all regions. These trainings are aimed at improving users’ riding skills, road signs knowledge and electrical & mechanical maintenance knowledge. Further, follow ups were conducted covering 5,168 Safety Advisors throughout the network. Safety Advisors then imparted the knowledge to 88,467 customers at dealerships.

Moreover, the safety riding school in collaboration with City Traffic Police, Lahore continued to educate and train young riders. In 2017-18, 14,680 license applicants achieved the training.

Safety lectures have always been important feature of our road safety program. Every year we engage various institutes, universities and colleges to hold these lectures that impart useful information and help reduce chances of accidents. Following are the details of activities carried out during the year under the banner of safety education:

- Safety riding training & features to Law Enforcement Agencies (Participants: 5,168 Officers)
- Safety riding training to employees of various organizations such as USAID, Nestle, Unilever, Honda Cars, Rescue 1122, participants: 1,477 Employees)
- Safety lectures to students from various educational institutions (Participated: 42,409 Students)

**Safety Riding Awareness Campaigns**
We coordinate with Traffic police Department to create awareness about the use of indicators, side mirrors and helmets. These safety measures can save motorcyclists from accidents and injuries. Under this campaign, we distributed more than 100,000 pamphlets in Lahore, Karachi, Islamabad, Chakwal and Gujranwala. Moreover, 868 helmets were distributed in Lahore and Islamabad. 458 back view mirrors and 8,760 lights were checked and replaced in Faisalabad, Karachi, Islamabad and Multan.

A Safety Gala was also organized in Islamabad in which various activities were carried out including Giraffe biker Motorcycle Riding Competition and training of young riders through simulator. More than 50,000 people attended this event. Moreover, 3rd Atlas Honda Safety Rally was held in Karachi on December 25, 2017 in which more than 8,600 customers participated.
Corporate Citizenship

Atlas Honda assumes responsibility – far beyond its boundaries. We demonstrate a strong social commitment and aspire to do what we can to help each member of the society reach their full potential and take the lead in developing the community where we operate.
Our Management Approach

Atlas Honda acknowledges its responsibility towards social prosperity. For this reason, we have been creating value since more than five decades and plan to continue doing the same in future. We provide economical and environment friendly mode of transportation in shape of two-wheelers to customers across Pakistan. However, our efforts are not restricted to fulfilling transportation needs of people in our communities. We actively carry out initiatives for better quality of life at our locations.

Our approach is driven by the needs of community, identified through surveys, social media pages, focal groups and meetings with the local community. We integrate this perspective into our development plans and overall strategy to deliver maximum benefit. The plans and their results are internally reviewed and management approach is adjusted accordingly. Further, we have a grievance mechanism in place for filing of issues with manager operations at both our plants. During the year, no significant negative effects on local communities were identified.

Implementation and monitoring of social activities at all our locations are routed through Senior Managers in HR, Admin & Corporate Affairs department and Engineering & Projects department who also review and analyze the monthly progress of such initiatives. Progress is reported to the senior management on a continuous basis.

Our commitments & initiatives for society revolve around health, education and communal initiatives.

Health

We believe that healthy populations contribute to economic progress of a country by being more productive and by saving on healthcare expenditure. Therefore, we aim to play our role for improvement of health of people within our community including those directly associated with us. In this regard, following initiative was undertaken during the year:

Blood Donation Campaign

We encourage our employees to do what they can for the welfare of their society. To provide them with an opportunity to do so, an interactive awareness session on “voluntary non-remunerated blood donation” was organized which was followed by a three-day blood donation camp in collaboration with Red Crescent where in, 240 associates from different departments volunteered and donated blood for those in need.

Education

Education is one of the keys to socio economic development. Therefore, we believe that improving access to education is one of the most long-lasting investments we can make for society and economic growth. We are utilizing our resources in a variety of education projects with a view to promote interest for education & awareness. In this respect, following activities were carried out during the year:

Support to Vocational Training

We provide job-specific technical training sessions to students from various institutes that impart hands-on knowledge of our operations and management functions. We have a pre defined methodology for this training program to attain optimal results. During the year, more than 900 students of various Vocational Training Institutes and Government Technical Training Institute attained the industrial and technical skills.

Communal Initiatives

We take advantage of our shared strengths and collaborate with various stakeholders to address social issues and carry out initiatives that are effective and according to the needs of community where we operate.

National Conference on Material Sciences 2018

We participated in National Conference on Material Sciences by way of sponsorship. The conference was organized by University of Karachi’s Physics department in collaboration with Higher Education Commission. The department has been playing an important role for development of science and technology in the country. The aim of this conference was to keep students abreast with recent developments in field of sciences.

DICE Automotive Innovation Event 2017

We participated, as sponsor, in an event organized by DICE Foundation in collaboration with its domestic and international partners and NED University of Engineering & Technology. All major brands of automotive and engineering sectors participated in this event. The event mainly focused on fostering a culture of innovation, collaboration and entrepreneurship among science students and to bridge the gap between academia and local industry so that former can act as a solution provider to industry.

STEM Savvy Kids Challenge

STEM Savvy Kids is an online competition for children between the age brackets of 3 – 15 years. The aim behind this contest is to bring the complex concepts of Science, Technology, Engineering and Maths in a fun and interactive way to kids. We sponsored an event to promote this style of learning with a vision to develop tomorrow’s scientists, engineers and mathematicians.

Donation

In line with our commitment and based on what has come from the society should be shared with the society, we support Atlas Foundation, a welfare and charitable organization. It was formed with a mission to make such contributions to the people of this nation. It is a fully registered charitable organization that is directly associated with us. We carry out initiatives that are effective and according to the needs of community where we operate.
Atlas Honda Limited remains committed to maintain highest standards while resiliently meeting economic and environmental challenges for sustained operations. Acknowledging its efforts for identifying, measuring and reporting key information with utmost transparency and credibility, the Company’s Sustainability Report, 2016 stood fourth at the “Best Corporate and Sustainability Report Awards 2016”, jointly organized by ICAP and ICMAP.

Additionally, the Company earned distinction with two awards at the “7th NFEH’s Corporate Social Responsibility Awards 2018” in the categories of “CSR Report, Research & Publications” and “Environment & Waste Management/Recycle” for its best efforts.

Women on Wheels
We have been undertaking various initiatives to provide women with requisite skill-set to increase their mobility and secure their independence. This is being done with an aim to create a culture where women can stand shoulder to shoulder with their male counterparts and make even larger contributions to their families and communities. As part of such initiatives, we provided bike riding training to 602 females under Women on Wheels, a project of Punjab Government.

Promoting Sports
Encouragement of sports activities is not only crucial for development of healthy individuals in a society but it also serves as a source of joy and entertainment for them. We sponsored Inter-Schools Cricket Cup 2017 held at Gujrat under the supervision of the Commissioner Lahore Division and Deputy Commissioner Gujrat. Teams from various schools in the city participated and the winner and runner up teams were awarded with cash prizes.

Further to promote and support the sports of squash in Pakistan, we sponsored the participation of three young squash players in Scottish Junior tournament and British Junior team event held in United Kingdom. We also supported Sidhu Tug of War Association in organizing “All Bihart Inter Divisional Tug of War Championship 2017” in Hyderabad.

Foreign Female Motorcyclists Tour
We organized an expedition for 12 female riders from across the world to boost confidence among women and promote adventure tourism industry in Pakistan. It was an honor for us to show our guests the real and positive picture of our country through this spectacular road trip to Northern Areas on Honda CB 150 F.

Women on Wheels project

Foreign bike riders’ road trip to Northern Areas on Honda CB 150 F
Vendor Management

We recognize our vendors as strategic business partners with whom we form mutually-beneficial, trust-based relationships. Therefore, we assist our suppliers in securing a competitive edge through our support and cooperation with an aim to build a sound and healthy corporate ecosystem and sustainable supply chain.
Our Management Approach

Our engagement with our vendors is a major source of value creation. We are convinced that working closely with vendors on issues including sustainability is key to achieve our own long-term goals, underscoring our position as a responsible manufacturer of two-wheelers and delivering an overall premium experience to our customers. Our supply chain has a vast network of vendors and we recognize the complexity of maintaining sustainability standards within it. At the same time, we see great opportunities in leveraging our own expertise and know-how to help vendors improve their performance.

Our supply chain is based on the philosophy of 3As which are:
1. Agility: We can quickly respond to any change in demand.
2. Alignment: Our supply chain designs strategies aligned with the business plan of Company.
3. Adaptability: We stay updated with the latest tools, technologies and methodologies of modern era.

In our engagement with vendors, we constantly discuss the challenges and opportunities we face and develop in-depth analysis on, and solutions to, key issues in a collaborative manner. Policies relating to our suppliers are implemented to ensure that we and our business partners are aware of local environmental, health, safety, and labour laws, as well as legal requirements and international sustainability principles. These guidelines and policies enable us to drive forward the sustainability goals of our supply chain and ensure their compliance.

Vendor Induction and Communication

Vendor Selection

Our vendor selection and approval process is based on a criteria comprising not only on their ability to provide quality parts at competitive terms but also their adherence to sustainability principles. We gain input for sourcing decisions from Supply Chain, Production, Commercial, Logistics, and Finance departments. We also seek to identify and work with companies having standards that are aligned or consistent with our procurement and production practices. We ensure that our ‘Vendor Policy’ and ‘Vendor CSR Guidelines’ are acknowledged and signed by all of our vendors.

We procure most of our requirements from locations in which our respective operating facilities are located as far as the same is qualitatively comparable, technically feasible, and economically justifiable. The raw materials and other components which are easily available in Pakistan are procured locally, except for those that are not available in Pakistan.

Vendor Diversity

We recognize that a diverse supply base is an integral part of our growth and success. It is crucial to deliver our promises of providing the best mobility solutions. We are committed to work with and develop businesses by creating opportunities and initiatives that enable diverse vendors to grow into profitable and sustainable enterprises. We continue to foster productive relationships with entrepreneurs from a wide range of backgrounds to meet our customers’ needs and expectations.

Business to Business Communication Portal

Open and transparent communication with fair and consistent behaviour is a key component in establishing strong and lasting relationships with our vendors. We have made available various forums for engagement at all levels, including regional vendor meetings, business unit reviews, quarterly business updates calls and participation in events organized by vendor and industry associations. In addition, Business to Business links has been established which allows our supply chain department and vendors to communicate without delays. It has helped us achieve:

- Real Time Communication.
- Paper Less Environment.
- On-Time Receiving & delivery
- Improvement in efficiency and effectiveness of Supply Chain.

Part Quality

We aim to keep our customers’ trust by emphasizing on importance of quality throughout our supply chain. To achieve this objective, we bind our vendors to establish and operate within a quality assurance system. Apart from our vision to procure inspection free parts, our vendors validate that parts delivered through their manufacturing processes meet our drawings accurately and achieve target of 0.1% rejection for incoming parts. Following measures were taken to achieve these quality objectives:

Vendor Improvement Program (VIP)

We launched our VIP program few years ago to improve quality and operations of our vendors. This program focuses on following six core areas:

- Drawing & Specification Control
- Dies & Tool Management
- In Process Inspection System

Supplier Quality Management

SQM is an extension of VIP aimed to achieve the goal of 0.1% rejection level. It addresses and emphasizes on supply of high quality parts that satisfy the needs and exceed the expectations of our customers. This year, 18 suppliers were trained under this program.

AALA Mayar Quality Event

AALA MAYAR Quality Event is our initiative where our vendors are encouraged to participate and collaborate with us to solve problems, add value and introduce innovation. Circulars are formed where our employees and vendors work together to discuss issues and devise solutions. This year, more than 100 vendors were trained in this contact out of which 93 best themes were selected from Karachi & Thalipura plants who were awarded on the basis of a pre-defined criteria. The 57th AALA MAYAR Award were distributed at our Annual Vendor Conference 2017 held on May 28, 2017.

CEO Mr. Syed H. Shahid addressing the audience at AALA MAYAR Quality Event

Atlas Honda Limited
Vendor Development

We encourage our vendors to invest in their facilities including their manufacturing capacity and new technology. The idea is to ensure that our vendors remain well-equipped to meet the demands of our said expansion. This year, an investment of Rs. 0.7 billion was made by our vendors in this regard.

We also believe in developing and strengthening competencies and skills of our vendor apart from their manufacturing capacities. For the purpose, we have been providing major technological assistance to our vendors, resulting in enhancement of their engineering skills and creation of employment opportunities.

Environmental and Social Performance

We are committed to continuously manage environmental and social impacts with responsibility within our supply chain, as well as our own operations. Our goal is to follow the best practices and enable our vendors to replicate the same and be accountable for their sustainability performance.

Guidelines to Vendors

Corporate Social Responsibility is embedded in our routine operational management in a clear and practical manner. All our products and services are regularly monitored for their impact on society and the environment. Given the increased expectations regarding sustainability, we recognize that it is essential to share our approach to sustainability with our vendors. In this regard, following guidelines have been issued to the vendors. We believe that these guidelines help our vendors in maintaining a shared understanding of sustainability, to carry out initiatives proactively and to continue growing together as companies that society wants to exist.

- Establish and monitor a company-wide social management system.
- Prevent climate change via reducing GHG emissions.
- Optimize packaging and establish efficient logistics operations in order to reduce waste disposal and transport emissions.
- Prevent pollution and contamination of air, water, soil, etc.
- Enforce proper disposal of waste and implement optimum recycling of waste and disposables etc.
- Compliance with laws and regulations along with commitment to protect human rights.

With activities coordinated regionally, the responsibilities include designing and operating the transportation network and devising high-quality and efficient packaging to protect materials in transit. Freight emissions are influenced by a wide and complex range of inter-related factors, including the mode of transportation, the efficiency of the equipment used and the design of the freight network. We find the most effective ways of achieving reductions are through:

- Improving the design and operation of our transportation networks
- Increasing vehicle utilization
- Increasing the use of greener modes of transport, such as rail and water

Environmental Impact Assessment Survey

Every year, we participate in environmental impact assessment survey developed by Honda Motor Japan. This year, 35 vendors were assessed on the basis of following criteria:

- Direct & Indirect GHG Emission
- Green Purchasing Guideline
- Chemical Substance Management
- Environmental Management System
- Energy Conservation Guidelines
- Water Resources Guidelines
- Pollution Prevention Guidelines
- Biodiversity Guidelines

None of the selected vendors were identified as having any significant actual and potential negative environmental impacts.

Human Rights & Working Conditions

Our human rights and working conditions program is an integral part of our efforts to develop a more sustainable and ethical supply chain. We aim to ensure that everything we make – or that others make for us – is consistent with local laws and our commitment to protecting human rights. Following guidelines are issued to our vendors for addressing human rights and working conditions related concerns:

- Eliminate discrimination in any aspect of employment based on race, ethnicity, nationality, religion, gender, or other characteristics.
- Ensure zero harassment in the workplace on the basis of race, ethnicity, and nationality of birth, religion, gender, or other characteristics.
- Avoid employment of workers who do not meet the legal minimum working age of each country and region.
- Avoid practicing forced labour. Guarantee that all labour is voluntary and that employees are free to leave their jobs.
- To comply with the laws & regulations regarding minimum wages, overtime, wage deductions, performance-based pay and other remuneration.
- To obey with the laws & regulations regarding the setting of employees' working hours (including overtime) and the granting of scheduled days off and paid annual vacation time etc.
- Ensure a safe and healthy working environment for all associates.

Approach to Conflict Minerals

International regulations such as the Dodd-Frank Act in the United States obligate companies to disclose the origin of certain raw materials to ensure that “conflict minerals”, such as tin, tungsten, tantalum and gold from the Democratic Republic of Congo or neighboring states, do not enter their products through their supply chain. We, therefore, monitor all vendors to make sure they do not source raw materials from the affected regions. Using a structured survey process and by working closely with our vendors for increased supply chain transparency, we obtain confirmation that our suppliers and their upstream suppliers are obtaining material free from conflict minerals. We also collaborate with a cross-industry group called Conflict-Free Sourcing Initiative (CFSI) in this regard. In order to be confirmed as conflict free, the smelters and refiners are required to pass an independent third-party audit. The results from this year’s survey confirmed that our supply chain is based on conflict free sourcing.
Employee Management

Our vision to remain the market leader is fueled by talent, diversity and dedication of our employees. They are our real assets – crucial for achievement of all targets. With an aim to be more than just a workplace, the foundation of our human resource philosophy is to be an equal opportunity employer. We place great emphasis on cultivating a corporate atmosphere conducive for open dialogue where employees can demonstrate their full potential.
Our Management Approach
Atlas Honda strives to create a workplace where employees are motivated to raise to the toughest of challenges and are able to bring efficiencies and innovation. Our main goal is to advance our strategic approach to talent management while taking into account the challenges arising from economic and industrial environment. We aim to unlock the potential of human resource management and resolutely add value to our business. A corporate culture guided by the principles of the Atlas Way forms the basis of our efforts in this area.

Policies are in place covering all aspects of employment, including employment and labour relations, training, human rights and health & safety. They are periodically reviewed and adjusted accordingly. We fully comply with applicable labour and health & safety laws and regulations that prohibit forced, compulsory and child labour. The notice period about operational changes is communicated to employees well in time. However, the notice period is not mentioned in the collective bargaining agreement. We are committed to the observance of fair working conditions and human rights. Gender equality and respect for diversity is deep rooted in our culture to encourage talented individuals with diverse backgrounds to demonstrate their full potential and evolve into leaders. As part of our talent management, performance appraisals are carried out which help in identification of career development and training needs of our workforce. This also allows us to ensure that the reward system remains fair. Further, our performance is constantly evaluated through surveys and awards. We are also continuously working to upgrade our human resources expertise, practices, systems, and service quality.

Recruitment and Retention
To maintain our status as the leading premium two-wheeler brand and to keep up with changing environment, our goal is to attract, recruit and retain the best talent. Our ability to provide unique opportunities, such as a diverse and supportive work environment, helps differentiate Atlas Honda from other employers and attract high-performing professionals who are competent, highly skilled and agile. As we are undertaking our capacity expansion plans, recruitment and retention of appropriate workforce becomes more crucial. We follow a uniform policy for hiring, job placement and human resource development. A thorough “Employee Orientation Training Program / Onboarding Program” has been designed to provide an overview of our culture and processes to all new hires.
Diversity and Inclusion

We value equality, diversity and inclusion. We adopt merit-based recruitment practices and strive for equal employment opportunities for all regardless of race, religion, gender, marital status, age or disability. We do not discriminate basics salary or remuneration on the basis of gender. During the year, no incidents of discrimination were reported. For hiring workers, equal weightage is given to candidates from across the country. We also support the recruitment and qualification of local personnel as a way of developing the local communities and regions in which we operate.

We hire men and women with vast experiences, from different industry backgrounds, cultures, beliefs and ethnicities. This ensures that we are able to adapt to the changing needs of our business. However, it is currently a challenge for the entire auto industry in Pakistan to attract sufficient number of female employees. Various initiatives are being undertaken to enhance the participation of women. During the year, 13 female executives were hired which improved the ratio of female executives to 2% from 1% last year. Women’s day was celebrated at all the offices and the female staff was given an opportunity to discuss and share their views and expectations. All female employees are entitled to three-month maternal leave. During the year under review, the leaves were not availed by any female associate.

We also support creation of job opportunities for persons with disabilities through provision of additional facilities and appropriate training. Currently, we have 23 persons who are differently-abled and are working for us.

Career Development and Training

We believe and act on the principle of “Organization development through self-development” and place great emphasis on capacity and skill building. We promote life-long learning by following the 70:20:10 formula, where 70% learning comes from an individual’s performance at their current job, 20% from coaching and 10% from formal training. Accordingly, we provide a broad range of opportunities to our employees from on-the-job learning and mentoring programs to trainings and courses. Such programs include various in-house, national and international programs. We also provide support for higher education and management courses at renowned business schools such as Harvard Business School and INSEAD (European Institute of Business Administration). A number of rotational programs are strategically and systematically implemented to give employees the experience required to serve at management positions. Our efforts for employee training and development during the year under review are reflected in the following table:

<table>
<thead>
<tr>
<th>Training Programs</th>
<th>No. of Persons trained</th>
<th>Training Days</th>
<th>Training Hours</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

An employee’s salary is adjusted based on the results of performance evaluations. We only provide full time employment and do not offer part time jobs. During the year, standard entry level wage was more than local minimum wage across all significant locations of operations.

All employees undergo performance appraisals twice a year. Annual Performance Appraisal is used as a basis for positioning of personnel within the Company and determination of annual increment. High performing individuals are promoted to higher grades and are awarded higher increments. Our performance management policy, under the Individual Development Program for management cadre employees, requires determination of areas of focus for internal and external trainings necessary for creation of future leaders.

We recognize the long serving employees by awarding them gold medals for their association with the Company for 15 years or more.

Employee Engagement and Connectivity

We are working on a variety of programs to enable our employees to find a healthy balance between their work and personal lives. We have created a culture of well-being to inspire employees’ engagement for better workforce productivity. In this regard, we plan events such as family day, picnic and sports and other recreational activities. During the year, following events were organized:

1. Bachelors’ day celebrations at SKP plant on November 19, 2017
2. Annual Family Day celebrations at SKP plant on November 25, 2017
3. Annual Cricket Tournament “Atlas Premier League” on February 20th and 21st 2018 at KCCA Stadium, Karachi

These events help us improve our communication with our employees. Further, every year an “Employee Vitality Level Survey” is conducted wherein the management and middle management associates participate to rate the company on 5 Engagement Factors. The mean score of the survey conducted this year was 4.88 out of 6. Areas of focus identified through the survey were work environment and recognition of performance. Accordingly, our human resource department is working to improve the policies so as to meet employee expectations in a timely manner.

Human Rights and Relations with CBA

We are committed to create an environment free of discrimination and harassment, in which all individuals are treated with respect, equality and dignity and have equal opportunities. We do not tolerate human rights violations of any kind. We are continuously reinforcing key management practices including: a guarantee of voluntary labour, observance of working hours, respect for diversity and workplace health and safety.

We strongly discourage any form of child labour and firmly comply with local regulations concerning legal minimum age requirements for work permits. We have a mechanism of periodical evaluation of our vendors for any possible violation of human rights including child labour. We do not have any child labour within our company nor are we aware of any such cases at our suppliers. There were no complaints reported during the year related to violation of human rights.

To maintain a relationship of mutual trust, we make every effort to engage in sincere discussions with our employees about any issues that exist or might arise. Moreover, an appropriate notification period is allowed before implementation of any change that can have
an impact on the employees. We recognize and respect the freedom of our employees to associate with labour unions under local laws. Constructive dialogue, negotiations and consultations are carried out with labour unions, when needed, at both our plants. All non-management employees are covered under CBA, which cover 7% of total permanent employees.

**Health and Safety**

We are Company is committed to safeguard the health and safety of our employees, contractors and visitors. The health and safety aspects are documented in contracts and agreements with the trade union. The risks of injury, death or ill-health of employees and those who work with the Company is a fundamental concern for us and have a significant consideration on our operations. We are striving to create a dynamic working environment that is conducive to the mental and physical well-being of its employees.

The responsibility for health and safety impacts rests with the General Manager Human Resource. The management approach comprises of health and safety policy, procedures and guidance documents. The health and safety committees are operational at each plant as per applicable laws and best available practices. The meetings of these committees are held on a regular basis to monitor health and safety issues and recommend improvements.

During the year, no major fatalities and injuries were reported. Major guidelines from the HSE policy have been displayed at prominent places within the company premises to manage safe working environment. Further, various fire trainings, evacuation drills, safety riding and basic first aid training sessions were conducted to familiarize associates with emergency action plan. 481 associates from various departments actively participated in these activities. The training on handling fire extinguisher, fire blanket and fire hydrants were also organized.

Various informal sessions of TBT (Tool Box Talk) were organized. The HSE issues including general electric safety, slip trip, use of PPE’s, fire fighting, first aid, safe work practices, rain emergency, harmful aspects of pan, gutka & chalia, and mobile phone hazards were discussed. A total of 1,108 associates attended the TBT sessions.

The Sustainability Report is issued by us to disseminate information about our economic, environmental and social impacts to our stakeholders, enabling them to make informed decisions. This section provides definitions, methodology guide and information on scope of the report. Unless otherwise specified or required by the context in which they are used, the terms “Atlas Honda” or “the company” or “we” refer to the Atlas Honda Limited and do not include its associated companies.

The information and data contained in this report relates to financial year 2018 (April 1, 2017 to March 31, 2018). The data presented in the report includes all plants and offices of Atlas Honda and does not include data on its associated companies.

The quality of the information contained in the report is in compliance with principles for defining report content and quality of the report as per GRI Standards.

The compilation of data has been done on the basic scientific measurement and mathematical calculus methods on actual basis, but in some cases where actual data is unavailable due to some reasons; different logical methodologies are used for calculations. The usage of any such method is mentioned at respective places in the report, where applicable. The data measurement techniques are same as used for previous year.

There has been no change in the reporting period, scope, boundary or measurement methods applied in the report. There are no changes that can significantly affect the comparability of data from period to period. Previous years’ figures have been regrouped/ rearranged wherever found necessary to conform to this year’s classification. Preparation of the sustainability report is part of annual reporting process subject to independ- ent review, analysis and approval of relevant authorities. We make every effort to ensure the accuracy of the sustainability information contained in this report. From time to time, however, figures may be updated. The online pdf version of the sustainability report will be considered the most current version and takes precedence over any previously printed version.

The Sustainability Report is:

• prepared by the sustainability reporting team that coordinates and engages relevant functions;
• approved by the Board of Directors;
• subject to an independent review by Corporate Social Responsibility Centre Pakistan, an independent reviewer, in compliance with GRI Sustainability Reporting Standards and ISAE 3000 (2003);
• published and freely available for download from the publication section of the company website (www.atlashonda.com.pk).
Independent Assurance Statement for the Atlas Honda Limited Sustainability Report 2018

Corporate Social Responsibility Centre Pakistan (CSRCP) performed an independent review of the Atlas Honda Limited (AHL) Sustainability Report 2018, which was prepared ‘in accordance’ with Global Reporting Initiative’s (GRI) Standards’ Core option. The objective of the critical independent review is to provide AHL’s Management with an independent opinion about the quality of the report and adherence to the principles of Inclusivity, Materiality, and Responsiveness.

Responsibility of AHL and of CSRCP

The Management of AHL is responsible for the preparation of the Sustainability Report and for the information and statements contained within it. The Management is responsible for determining the Sustainability goals, performance, and for establishing and maintaining appropriate performance management and internal control systems from which the reported information is derived.

Our responsibility is to express independently a conclusion about the quality of the report and adherence to the principles of Inclusivity, Materiality, and Responsiveness.

Assurance methodology

Our activities included a desk review of the final draft report. We communicated with AHL to determine the accuracy and authenticity of report content, data points, methodologies and policies around the organization’s social, environmental and economic data and activities.

Our procedures on this engagement included:
- Critical review of the Sustainability Report 2018 and respective Content Index to check consistency and adherence to GRI’s Universal and Topic-Specific Standards
- Evaluation of report adherence to the in accordance: Core option
- Analysis of the report content against principles of Inclusivity, Materiality and Responsiveness
- Elaboration of an adjustment report
- Final review of the report content

The work was planned and carried out to provide limited, rather than absolute assurance and we believe that the desk review of the AHL Sustainability Report completed by CSRCP provides an appropriate basis for our conclusions.

Opinion

GRI Standards in accordance option

AHL declares the report to be in accordance with GRI Standards: Core option. CSRCP evaluated the quality of the application of GRI Universal and Topic Specific Standards. Based on the evaluation, CSRCP made a series of recommendations to complete the content or adjust the disclosure level in the Content Index, which have been accepted by the company. Based on the rectifications, we can confirm that the report is attending the above mentioned ‘in accordance’ option, giving a complete overview of AHL’s sustainability governance and management systems in place to provide limited assurance on performance data within the Sustainability Report.

- Adherence to the principles of Inclusivity, Materiality and Responsiveness.

Main Conclusions on Adherence to Principles of Inclusivity, Materiality and Responsiveness

Inclusivity – addresses the stakeholders’ participation in the process of developing and implementing a transparent and strategic sustainability management process.

- AHL report addresses how company identifies and engages with different stakeholders, including AHL focus for engagement and AHL response.
- The material issues emerging from the stakeholder engagement were collected, prioritized and the results are fairly reflected in the report. It would be recommendable to carry out a report specific stakeholder engagement and demonstrate how stakeholder input is effectively utilized in strategic decision making.

Materiality – issues required by stakeholders to make decisions on the organization’s economic, environmental and social performance.

- Material issues have been identified by AHL in a Materiality Matrix which considers the influence on stakeholder assessment and decisions and the significance of environmental, social and economic impacts, using a commonly accepted approach. The parameters of risks and opportunities were considered in the materiality determination process, which makes the process more focused on prioritizing issues relevant to AHL.

Responsiveness – addresses the action taken by the organization as a result of specific stakeholders’ demands.

- AHL has appropriate policies and externally certified quality, environmental and health & safety management systems, which involve a high level of analysis of risks, non-compliance and corrective actions.
- Sustainability management at AHL maintains high level support, conforming AHL’s commitment to address sustainability challenges, stakeholder concerns, and promoting sustainable practices in its supply chain.

Statement of conclusion

Based on the scope of our work and the assurance procedures we performed using the ISAE 3000 (Revised) assurance standard, we conclude that nothing has come to our attention that causes us to believe that the information in AHL’s Sustainability Report 2018 is in all material aspects not fairly stated.

We confirm that the report is aligned with the requirements of the GRI Standards and reports its material topics in an adequate manner. The compliance with GRI Standards has been disclosed in more detail in the Content Index which provides overview of which standards have been fully compiled and which have been partially compiled in the report. In our opinion AHL has appropriate systems for collection, aggregation and analysis of the data presented in the report.

Limitations and exclusions

Excluded from the scope of our work is any verification of information relating to:
- Physical verification of data, content of AHL’s Sustainability Report;
- Positional statements (expression of opinion, belief, aim or future intention of AHL) and statements of future commitment.

Statement of independence, impartiality and competence

CSRCP operates strict conflict of interest checks and has confirmed our independence to work on this engagement with AHL. The members of the review team have not provided consulting services and were not involved in the preparation of any part of the report. CSRCP is a consulting firm specialized in sustainability. The review team has the required combination of education, experience, training and skills for this engagement.

Islamabad, June 1, 2018

Muhammad Arfan Nazir,
Director, Corporate Social Responsibility Centre Pakistan.
### GRI Content Index

The following table lists all disclosures in accordance with the GRI Standards included in the report and helps the reader in locating content within the document. Each disclosure is followed by reference to the appropriate pages in this report or other publicly available sources.

**Key**
- **SR** = Sustainability Report 2018
- **AR** = Annual Report 2018
